## SUMMARY

Full Stack Web Developer with a background in Anti Money Laundering and a life-long dedication to personal improvement. Worked with groups and individually to design and implement full stack web pages. Recognized in prior jobs as a top performer in quality and production goals.

## TECHNICAL SKILLS

**Languages: HTML, CSS, JavaScript**
**Applications: Node, Express, SQL, Git, MongoDB, Heroku, MERN Stack Development, JQuery, Bootstrap, Firebase, MySQL, Handelbars.js, and ReactJS**

## PROJECTS

**Movies|https://bit.ly/3QpTU9c|https://bit.ly/3cQ50H9**
- Movies allows the user to search a year from 1950 to current that will display the top 5 movie, with the inclusion of a fun activity to do while watching built using HTML, CSS, JavaScript, Tailwind framework, IMDb and Bored APIs
- Personal responsibilities include the backend implementation of JavaScript for site functionality and API fetches

**MyPantry|https://bit.ly/3KUvNyD| https://bit.ly/3ewopgD**
- My Pantry is a virtual list of everything in your pantry allowing users to access a list on the go using Node.js, Express.js, Sequelize ORM, MySQL, BCrypt, JavaScript, Tailwind CSS, Handlebars, Heroku, and jawsDB
- Personal responsibilities include building the Handlebars.js templates, working on sessions data, and creating frontend routes

**WheytsUp | https://bit.ly/3AGUACu | https://bit.ly/3x58Jrb**
- WheytsUp allows people to create their own personal workout routines that can be saved and rated using React, graphQL, HTML, JavaScript, and Material UI
- Personal responsibilities include front end layout, styling, and JavaScript functionality for authentication

## WORK EXPERIENCE

**Web Developer**                                    08/2022 - Present
**Freelance**                                        Remote
- Create website designed based on client needs
- Develop and deploy full front and back-end websites using React.js, graphQL, MongoDB, and AWS

**Anti Money Laundering Analyst**                    2021 - 2022
**AML RightSource**                                  Phoenix, AZ
- Investigate and analyze alerts to draw useful conclusions on the necessity of a SAR filing
- Manage time to ensure production numbers for daily and weekly alerts are achieved and exceeded
- Recognized as top production producer and second quality producer out of team of 30

**Shift Manager**                                    08/2019-12/2021
**Starbucks**                                        Tempe, AZ

- Calculate pars, an inventory system for ordering, based off recorded numbers to reduce the amount of waste while increasing customer satisfaction
- Manage and mentor teams of up to 12 employees to promote a positive workplace in a fast paced environment

**Barista**                                                                                        08/2016 - 07/2019
**Starbucks**                                                                                        Monroe, WA

- Communicate with customers to understand their needs and quickly accomplish requests via drink or food orders

## EDUCATION

**Full Stack Web Development Bootcamp Certificate:** University of Arizona, Tucson, AZ
**Bachelor of Science in Mathematics, Statistics:** Arizona State University, Tempe, AZ

- Research project: The Effects of Tongue Tie on Breast-Feeding
  - Data processing using JMP to create a workable dataset
  - Analyzing the cleaned data in JMP by fitting several models to find the best predictive model to show how a procedure to correct tongue-tie in infants impacts breast-feeding
